

AI Email Assistant is an intelligent email automation workflow designed for **n8n**.

It automatically processes incoming emails, classifies them into the correct category, generates AI-powered replies, creates professional email subjects, logs activities into Google Sheets, and manages customer support tickets without manual effort.

Automatic Email Classification
Detects Order, Inquiry, Complaint, Spam, and Thank You emails.

AI Reply Generation
Creates professional email responses using an AI model.

AI Subject Generator
Generates clear and relevant email subject lines automatically.

Complaint Ticket System
Creates unique support ticket IDs and stores them in a dedicated Ticket Log Sheet.

Google Sheets Logging
Records all processed emails in organized log sheets for tracking and reporting.

Spam Management
Automatically marks spam emails and stores them for future reference.

Attachment Handling
Saves email attachments directly to Google Drive (if enabled).

Introduction

Welcome to the AI Email Assistant Setup Guide.

This guide provides complete instructions for installing, configuring, and using the AI Email Assistant workflow in n8n. It is designed to help users quickly set up the workflow, connect the required services, configure AI models, and begin automating email management.

By following this guide, you will be able to classify incoming emails, generate AI-powered replies and subject lines, log email activities in Google Sheets, create complaint tickets, and manage attachments through Google Drive.

Overview

AI Model

Compatible with Gemini, OpenAI, Claude, and other supported AI providers

Estimated Setup Time
Supported Categories

15–30 Minutes

Order, Inquiry, Complaint, Spam, and Thank You

Suggestion

- ☐ Configure all required credentials before activating the workflow.
- ☐ Test each email category (Order, Inquiry, Complaint, Spam, Thank You) before production use.
- ☐ Verify Gmail, Google Sheets, and Google Drive connections.
- ☐ Regularly monitor Google Sheets logs to track email activity.
- ☐ Keep your AI model API credentials active and secure.
- ☐ Back up your workflow JSON before making major changes.
- ☐ Review AI-generated replies before enabling automatic sending (if applicable).
- ☐ Update prompts and categories as your business requirements evolve.

AI Email Assistant for n8n

Complete Setup Guide

Author: Tahir Abbas

Chapter 1

Welcome

Thank you for purchasing **AI Email Assistant for n8n**.

This workflow is designed to automate your entire email support process using AI.

Instead of manually reading and replying to emails, this workflow automatically:

- ✓ Reads every incoming Gmail
- ✓ Detects attachments
- ✓ Uploads attachments to Google Drive
- ✓ Classifies emails using Gemini AI
- ✓ Generates professional email replies
- ✓ Generates professional email subjects
- ✓ Sends reply emails automatically (or as drafts)
- ✓ Stores every email inside Google Sheets
- ✓ Generates Ticket IDs for complaints
- ✓ Stores complaint tickets in a separate sheet

No coding experience is required.

Workflow Overview

Your workflow looks like this:

How this Workflow Works

New Gmail

|

check Attachment

|

Upload Attachment (optional)

|

AI Email Classifier

|

Category Switch

|

|

|

|

|

|

Order

Inquiry

Complaint

Spam

Thank You

Every category has its own AI Reply Generator.

After the reply is generated,

AI generates a professional subject

Gmail sends the email

Google Sheets stores the logs.

Complaint emails also generate Ticket IDs.

Main Features

Gmail Integration

Automatically watches your Gmail inbox.

No manual checking is required.

AI Email Classification

Every incoming email is automatically classified into one of these categories.

- Order
- Inquiry
- Complaint
- Spam
- Thank You

AI Reply Generator

Each category has its own dedicated AI prompt.

This makes replies much more professional.

AI Subject Generator

Instead of using the customer's original subject,

Gemini creates a professional business email subject.

Example

Customer Subject

Help me please

AI Subject

Regarding Your Recent Product Inquiry

Google Drive Upload

If the customer sends files,

they are automatically uploaded to Google Drive.

Google Sheets Logging

Every processed email is saved.

Examples

Order Log

Inquiry Log

Complaint Log

Spam Log

Thank You Log

Complaint Ticket System

Complaint emails automatically generate a Ticket ID.

Example

TKT-20260721-2483

The ticket is also saved separately inside the Ticket Sheet.

Categories Explained

Order

Customer wants to purchase a product.

Example

I would like to order five laptops.

Workflow

Reply

↓

Subject

↓

Send Email

↓

Order Log Sheet

Inquiry

Customer is asking a question.

Example

Can you tell me your shipping charges?

Workflow

Reply

↓

Subject

↓

Send Email

Inquiry Log Sheet

Complaint

Customer is unhappy.

Example

My package arrived damaged.

Workflow

Generate Ticket

AI Reply

Subject

Send Email

Ticket Sheet

Complaint Sheet

4 Spam

Spam emails are not replied to.

Instead,

they receive the Gmail Spam label.

Then,

they are stored inside

Spam Log Sheet.

5 Thank You

Customer sends appreciation.

Example

Thank you for your excellent service.

Who is this Workflow For?

This workflow is perfect for:

- ✓ Small Businesses
- ✓ Ecommerce Stores
- ✓ Customer Support Teams
- ✓ Freelancers
- ✓ Agencies

✓ SaaS Businesses

✓ Digital Product Sellers

✓ Online Stores

Requirements

Before importing this workflow, you need:

- Node.js
- n8n
- Gmail Account
- Google Cloud Project
- Gmail API Enabled
- Google Drive API Enabled
- Google Sheets API Enabled
- Gemini API Key
- Google Sheets
- Google Drive Folder

Before You Begin

Please make sure you have:

- ☐ Installed n8n
- ☐ Created a Google Cloud Project
- ☐ Enabled Gmail API
- ☐ Enabled Google Drive API
- ☐ Enabled Google Sheets API
- ☐ Generated Gemini API Key
- ☐ Created Google OAuth Credentials
- ☐ Downloaded this workflow JSON
- ☐ Imported the workflow into n8n

Chapter 2 – Getting Started with n8n

Overview

Before using the AI Email Assistant workflow, you need access to **n8n**.

This chapter explains how to create your n8n workspace, import the workflow, and prepare it for configuration.

No programming experience is required.

What is n8n?

n8n is a workflow automation platform that allows you to connect apps, AI models, and cloud services using a visual drag-and-drop interface.

Instead of writing code, you build workflows by connecting nodes together.

This AI Email Assistant has been built entirely using n8n.

What You Need Before Starting

Before importing the workflow, make sure you have:

- ✓ An n8n account
- ✓ A Google Account
- ✓ A Google Cloud Project

✓ A Gemini API Key

✓ Google Sheets

✓ Google Drive

Creating Your n8n Account

Visit the official n8n website.

Create a new account using your email address.

Once your account is verified, sign in to access your workspace.

The n8n Dashboard

After signing in, you'll see the n8n dashboard.

From here you can:

- Create new workflows
- Import existing workflows
- Manage credentials
- Test workflows
- View execution history

Creating a New Workflow

Click the **Create Workflow** button.

A blank workflow canvas will open.

This is where all automation is built.

Screenshot Placeholder: *Blank Workflow Canvas*

Understanding the Workflow Canvas

The workflow canvas is the main working area in n8n.

It contains:

Workflow Toolbar

Used to:

- Save Workflow
- Execute Workflow
- Activate Workflow

Nodes

Each block is called a **Node**.

Every node performs a specific task.

Example:

- Gmail Trigger
- Gemini AI
- Google Sheets
- Google Drive
- Switch

Connections

Lines connecting nodes represent the flow of data.

Information moves from one node to the next automatically.

Importing the Workflow

Click:

⋮ (Three Dots)

Import from File

Choose:

AI_Email_Assistant.json

Wait a few seconds.

Your workflow will appear on the canvas.

Workflow Successfully Imported

After importing, you will see the complete AI Email Assistant workflow.

The workflow includes:

- Gmail Trigger
- Attachment Detection
- Google Drive Upload

- AI Email Classification
- Category Switch
- AI Reply Generation
- AI Subject Generation
- Google Sheets Logging
- Complaint Ticket Generation

Screenshot Placeholder: *Complete Workflow*

Understanding the Workflow Structure

The workflow follows this process:

Incoming Gmail

↓

Check Attachment

↓

Upload to Google Drive (Optional)

↓

Gemini Email Classifier

↓

Category Switch

Order

Inquiry

Complaint

Spam

Thank You

AI Reply

AI Subject

Send Email

Google Sheets

Categories Included

Your workflow automatically classifies emails into five categories.

 **Order**

Customers placing new orders.

Inquiry

General customer questions.

Complaint

Customer complaints.

Automatically generates Ticket IDs.

Thank You

Appreciation emails.

Spam

Unwanted emails.

Automatically logged separately.

Your Workflow Includes

 AI Email Classification

 Professional AI Replies

 AI Subject Generator

☒ Gmail Automation

☒ Google Drive Attachment Upload

☒ Google Sheets Logging

☒ Complaint Ticket Generator

☒ Separate Ticket Log

Save Your Workflow

Before making any changes,

click the **Save** button.

This ensures all future edits are stored safely.

Before Continuing

Confirm the following:

☐ n8n account created

☐ Workflow imported successfully

☐ Workflow opens without errors

☐ All nodes are visible

□ Workflow saved

Chapter Summary

In this chapter, you learned how to:

- Create an n8n account
- Open the workflow editor
- Import the AI Email Assistant workflow
- Understand the workflow layout
- Save your workflow

You are now ready to configure all required services.

Chapter 3 – Connecting Google Services &

AI

Overview

Before running the workflow, you need to connect all required services to n8n.

This workflow uses four main services:

- Gmail

- Google Drive
- Google Sheets
- Gemini AI

Once these connections are configured, the workflow will be ready to process emails automatically.

Services Used in This Workflow

Service	Purpose
Gmail	Read and send emails
Google Drive	Store customer attachments
Google Sheets	Save email logs and ticket logs
Gemini AI	Classify emails, generate replies, and generate subjects

 **Screenshot Placeholder:** *Workflow with Gmail, Drive, Sheets and Gemini nodes highlighted.*

Step 1 – Open the Credentials Manager

In n8n:

Click **Credentials** from the left sidebar.

Click **Create Credential**.

This is where all external accounts are connected

Gmail Credential

The Gmail credential allows the workflow to:

- Read incoming emails
- Send AI-generated replies
- Access email subjects and message content

Create Gmail Credential

1. Click **Create Credential**
2. Search for **Gmail OAuth2 API**

3. Select **Gmail OAuth2 API**

Connect Your Gmail Account

Click **Sign in with Google**.

Select the Gmail account you want this workflow to use.

After authorization, the credential status should display:

 Connected

Test Gmail Connection

Open the **Incoming Email Trigger** node.

Click **Test Step**.

If everything is configured correctly, n8n will retrieve your latest Gmail messages.

Expected Output:

- Sender
- Subject
- Email Body
- Date
- Attachments (if available)

Google Drive Credential

Google Drive is used to store customer attachments automatically.

If an incoming email contains an attachment, the workflow uploads it to your selected Google Drive folder.

Create Google Drive Credential

1. Click **Create Credential**
2. Search for **Google Drive OAuth2 API**
3. Connect your Google account

After authorization:

 Connected

Configure the Drive Upload Node

Open the **Upload Attachment to Drive** node.

Select:

- Google Drive Credential
- Destination Folder

Example:

Customer Attachments

Every new attachment will be uploaded to this folder automatically.

Google Sheets Credential

Google Sheets stores all processed emails.

Your workflow includes separate log sheets for:

- Order
- Inquiry
- Complaint
- Spam
- Thank You
- Ticket Log

Create Google Sheets Credential

1. Click **Create Credential**
2. Search for **Google Sheets OAuth2 API**
3. Sign in with your Google account

Status:

 Connected

Configure the Log Sheet Nodes

Open each Google Sheets node and select:

- Spreadsheet
- Worksheet (Tab)

Example:

Order Log Sheet

Spreadsheet:

AI Email Logs

Worksheet:

Orders

Repeat this process for:

- Inquiry Log

- Complaint Log
- Spam Log
- Thank You Log
- Ticket Log

 **Screenshot Placeholder:** *Google Sheets node configuration.*

Gemini AI Credential

Gemini powers all AI features inside this workflow.

It is responsible for:

- Email Classification
- AI Reply Generation
- AI Subject Generation

Create Gemini Credential

Click:

Create Credential

Google Gemini API

Paste your API Key.

Example:

AIzaSy*****

Click **Save**.

Status:

 Connected

 **Google Gemini(PaLM) Api account** Save

API Key *

Nodes Using Gemini AI

Your workflow includes multiple Gemini nodes.

These include:

- Email Classifier
- Order Reply AI
- Order Subject AI
- Inquiry Reply AI
- Inquiry Subject AI
- Complaint Reply AI
- Complaint Subject AI
- Thank You Reply AI

- Thank You Subject AI

Each node has its own prompt, allowing category-specific responses.

Test Your Connections

Before running the full workflow:

Open each node and click **Test Step**.

Ensure that every node shows a successful output.

Checklist:

- ☐ Gmail Connected
- ☐ Google Drive Connected
- ☐ Google Sheets Connected

☐ Gemini API Connected

Common Connection Issues

Gmail Authentication Failed

Possible Cause

Google account not authorized.

Solution

Reconnect the Gmail credential and grant all required permissions.

Google Drive Upload Failed

Possible Cause

Folder not selected.

Solution

Choose the correct destination folder inside the Upload node.

Google Sheets Error

Possible Cause

Spreadsheet or worksheet not selected.

Solution

Verify that each log node points to the correct spreadsheet and worksheet.

Security Best Practices

- Never share your API keys publicly.
- Keep OAuth credentials private.
- Do not include credentials inside the exported workflow JSON.
- Before sharing or selling the workflow, remove personal credentials so buyers can connect their own accounts.

Chapter Summary

In this chapter, you connected all required services:

 Gmail

 Google Drive

 Google Sheets

 Gemini AI

Your workflow is now ready for configuration and testing.

Chapter 5 – Configuring the Workflow

Overview

After importing the workflow and connecting all required credentials, the next step is configuring each node correctly.

This chapter explains how to configure every section of the workflow before activating it.

By the end of this chapter, your workflow will be fully configured and ready for production.

Workflow Architecture

Image: Complete Workflow Overview

① Incoming Email Trigger

② Check Attachment

③ Upload Attachment

④ Email Classifier

⑤ Category Switch

⑥ Order Workflow

⑦ Inquiry Workflow

⑧ Complaint Workflow

⑨ Spam Workflow

⑩ Thank You Workflow

Section 1 — Incoming Email Trigger

Purpose

The Incoming Email Trigger monitors your Gmail inbox and automatically starts the workflow whenever a new email arrives.

Every email received becomes the input for the automation.

Configuration Checklist

✓ Gmail Credential Selected

✓ Inbox Selected

✓ Trigger Enabled

✓ Test Successful

Output

The trigger provides:

- Sender Name
- Sender Email
- Subject
- Email Body
- HTML Body
- Attachments
- Date & Time
- Thread ID

These values are used throughout the workflow.

Section 2 — Check Attachment

Purpose

This node determines whether the incoming email contains one or more attachments.

If Attachment Exists

↓

Upload to Google Drive

If No Attachment Exists

↓

Continue directly to AI Email Classification.

Best Practice

Use a dedicated folder in Google Drive for customer attachments.

Example:

Customer Attachments

Section 3 — Upload Attachment

Purpose

Uploads customer attachments to Google Drive automatically.

Supported file types include:

- PDF
- DOCX
- XLSX
- JPG
- PNG
- ZIP

Recommended Folder Structure

Google Drive

AI Email Assistant

└── Customer Attachments

Section 4 — Email Classifier

Purpose

The Email Classifier analyzes the customer's message and assigns it to one of the predefined business categories.

Categories

Category	Description
Order	Customer wants to purchase a product
Inquiry	Customer asks a question
Complaint	Customer reports an issue

Spam	Unwanted or promotional email
Thank You	Customer expresses appreciation

AI Processing

The classifier only returns one category.

Example

Input

Hello, I would like to order three office chairs.

Output

order

Section 5 — Category Switch

Purpose

The Category Switch directs each email to the correct workflow branch.

Incoming Email

↓

Category Switch

|—— Order

|—— Inquiry

|—— Complaint

|—— Spam

|—— Thank You

Every branch contains its own reply logic.

Section 6 — AI Reply Generation

Every category uses a dedicated AI Reply node.

Examples:

- Order Reply AI
- Inquiry Reply AI
- Complaint Reply AI
- Thank You Reply AI

Purpose

Generate a professional customer response based on the email category.

Replies are:

- Professional

- Friendly
- Business Appropriate
- Context Aware

Section 7 — AI Subject Generation

Every category includes its own Subject Generator.

Purpose:

Create a clear and professional email subject.

Example

Customer Subject

Help

Generated Subject

Regarding Your Recent Product Inquiry

Section 8 — Complaint Ticket System

Purpose

Complaint emails automatically receive a unique Ticket ID.

Example

TKT-20260721-2483

The Ticket ID is:

- Added to the AI reply
- Logged in the Complaint Log
- Saved in the Ticket Log

Section 9 — Email Delivery

Each workflow branch ends with a Gmail Send node.

This node:

- Sends the AI-generated reply
- Uses the AI-generated subject
- Sends the response to the original sender

Required Fields

Google Sheets Logging

Configuration Checklist

Before activating the workflow, verify:

- ☐ Gmail connected
- ☐ Google Drive connected
- ☐ Google Sheets connected
- ☐ Gemini API connected
- ☐ All log sheets selected
- ☐ Drive folder selected
- ☐ AI nodes tested
- ☐ Workflow saved

□ Workflow activated

Best Practices

- Use a dedicated Google Drive folder for attachments.
- Keep separate log sheets for each category.
- Test every branch (Order, Inquiry, Complaint, Spam, Thank You) before going live.
- Review AI prompts periodically to match your business tone.
- Export a backup of the workflow after major changes.

Chapter Summary

You have now configured the core components of the AI Email Assistant.

The workflow is ready for testing and production use.

Chapter 6 – Testing & Validation

Overview

Before activating the workflow in a production environment, every workflow branch should be tested individually.

This chapter explains how to verify each category, ensure correct AI responses, validate Google Sheets logging, confirm attachment uploads, and test the Complaint Ticket System.

Testing each scenario before deployment helps ensure reliable and consistent automation.

Send Order Email

↓

Order Log Sheet

Please check the remaining emails in the same way as well.

Email Validation Checklist

Every generated email should include:

- ✓ Professional greeting
- ✓ Professional response
- ✓ Clear subject
- ✓ Business tone
- ✓ Correct recipient
- ✓ Correct formatting
- ✓ Professional signature

Workflow Validation Checklist

Before deployment, verify:

- ✓ Gmail Trigger starts correctly
- ✓ Attachments upload successfully
- ✓ AI classifies correctly
- ✓ Category Switch routes correctly

- ☒ AI reply generated
- ☒ AI subject generated
- ☒ Email delivered
- ☒ Google Sheets updated
- ☒ Ticket created (Complaint)

Production Readiness Checklist

Before using this workflow in a live environment:

- ☒ Test all five categories
- ☒ Verify all Google credentials
- ☒ Confirm Google Sheets logging
- ☒ Confirm attachment uploads
- ☒ Review AI prompts
- ☒ Export a backup of the workflow
- ☒ Activate the workflow

Quality Assurance Checklist

Test	Status

Drive Upload	☒
Sheets Logging	☒
Order Workflow	☒
Inquiry Workflow	☒
Complaint Workflow	☒
Spam Workflow	☒
Thank You Workflow	☒
Ticket Generation	☒
AI Reply Quality	☒

Chapter Summary

You have successfully validated every major component of the AI Email Assistant.

The workflow has been tested for:

- Email classification
- AI reply generation
- Subject generation
- Attachment handling
- Google Drive uploads
- Google Sheets logging
- Complaint ticket generation

Your workflow is now ready for production use.
